

AGILELAW an Esquire Service

Organize and Present Electronic Exhibits – In One Secure Place

The tremendous growth of remote depositions has forced attorneys to forgo the familiarity of paper and look for a new way to organize, manage, and present exhibits. Attorneys know they have to change, but they want to continue to control the pace of questioning, rather than be forced to take multiple steps to share an exhibit and wait for the witness (and others) to find the right page before continuing.

AgileLaw®, an Esquire Deposition Solutions service offering, makes it easy for litigating attorneys and their legal staff to prepare, manage, share, and present digital exhibit files as well as maintain a central collection of exhibits for the life of the case.

AgileLaw gives attorneys the power to keep control over the documents before and during the proceeding. Different file types can be uploaded and organized in a specific order. Presenting and stamping exhibits is easy, enabling the attorney to maintain their pace and their focus. The witness can be directed to a particular page in an exhibit for their review, annotation, or comment. Opposing counsel can download the unmarked exhibits. All of this can be accomplished while keeping case documents in one secure, centralized location accessible from anywhere.

Attorneys:

- Coordinate and present exhibits across multiple proceedings
- Manage large document collections for remote or in-person proceedings anywhere in the world
- Easily manage, reuse exhibits for multiple proceedings
- Maintain pace of questioning (simplified sharing, stamping, distributing)
- Secure exhibits before, during, and after the proceeding

Legal Staff:

- Upload and prepare electronic documents (multiple formats) in one, secure place
- Tag documents by issue to simplify the process of finding them
- Save time and money around organizing, shipping, and introducing exhibits
- Upload documents at any time, even during the proceeding

Enterprise Clients | Insurance Companies

- Your law firms can manage large volumes of exhibits efficiently
- Secure exhibits before, during, and after the proceeding
- Control litigation costs by eliminating the charges that come with paper exhibits

EASILY HANDLE EXHIBIT-INTENSIVE, LARGE AND COMPLEX CASES

- Construction Defect litigation where many parties need access to exhibits during the proceeding
- Complex financial, patent, and IT litigation where confidentiality is critical
- Multi-state and cross-border litigation where there are many documents that need coordination, and there are multiple locations
- Any litigation where you need to control your exhibits

ESQUIRE
DEPOSITION SOLUTIONS

“Overall, it was a great system and I look forward to using it again.
I’m quite pleased. I really like the functionality.”

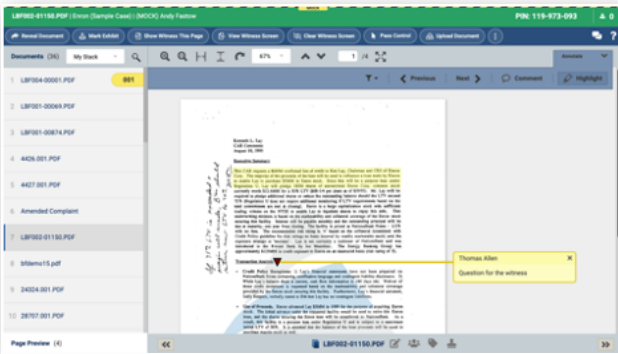

– Tom Fulford, Prince Lobel

HOW IT WORKS: AgileLaw is an advanced exhibit management web-based solution that provides the attorney with an easy way to manage and present exhibits. Here’s how AgileLaw helps you before, during, and after the proceeding.

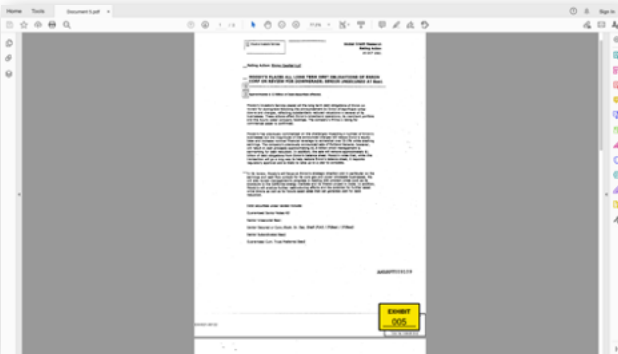

BEFORE the Proceeding

Drag-and-drop a single file or an entire directory of files of different file formats, including spreadsheets, prior to the proceeding. Organize documents in a specific presentation order based on the order of questioning. Create custom file names to identify documents more easily, and create a working copy with highlights, comments, and bookmarks that only the taking attorney can see.

DURING the Proceeding

Share documents, stamp exhibits, and use a private working copy to quickly jump from one question to the next with the click of the mouse. The witness, opposing counsel, and other participants see documents as they are introduced. AgileLaw enables the taking attorney to direct the witness to a specific page with a click, and all parties can see what the witness is viewing to ensure everyone is looking at the same page. Opposing counsel can use AgileLaw for cross-examination, using that proceeding’s exhibits or their own documents.

AFTER the Proceeding

All exhibits are in PDF format with stamps, and are immediately available for the taking attorney, and for the life of the case.

AgileLaw® is a product of AgileLaw LLC. All rights reserved.

Supported File Formats: Text, HTML, PDF, TIFF, PNG, GIF, JPG, audio, video and Microsoft Office formats are accepted. AgileLaw converts all non-PDF printable documents to PDF during the upload process. Non-printable files (audio and video) are embedded as a downloadable attachment with a PDF placeholder.

Supported Devices: AgileLaw supports most modern web browsers (Chrome, Safari, Firefox, Edge, or Internet Explorer 11+) and the app is available for iPads, Android Tablets (requires v4.2), Surface Tablets, or Kindle Fire tablets.

Security: Documents are encrypted at rest and in transit. The encryption algorithm is AES-256. External access to AgileLaw servers is controlled by multiple layers of firewalls and intrusion protection systems and is configured and monitored according to industry best practices. All data transferred between a user and its servers are encrypted, with security matching or exceeding that used by financial institutions.

Drag-and-Drop Interface: Using intuitive mouse drag-and-drop technology, attorneys and their legal staff can upload files, re-order documents, assign labels, and link exhibits to specific proceedings.
