

eLitigate[®]

Esquire's all-in-one, purpose-built secure solution for virtual depositions, whether a single deposition or multiple depositions spanning the duration of a case

Recent shifts in the legal and business landscape have brought about significant changes to established practices. Professionals tasked with conducting depositions have experienced a rapid transformation in the tools they use.

In response to evolving needs, lawyers and litigation team members have embraced commercial videoconferencing platforms as an alternative to in-person proceedings. While successful as a quick fix, these platforms have showed their limitations, from high-profile security flaws to the challenges of coordinating multiple applications that don't belong together.

Benefits of a purpose-built solution

- **Depose witnesses or attend depositions virtually.** The platform emulates in-person deposition workflows and streamlines the entire deposition process without the hassle, limitations, and expense of other solutions.
- **Access case exhibit folders.** After each deposition, eLitigate automatically adds the deposition's exhibit folder to future case depositions. This simplifies the exhibit preparation process for the next deposition and keeps all of the exhibits at your fingertips.
- **Create collaborative case teams.** eLitigate facilitates seamless team collaboration of document selection, review, presentation, and questioning.
- **Review in-session audio testimony.** With real-time speech-to-text testimony, parties can search text and playback audio clips.

Now, in our ongoing adaptation to a contemporary work environment that embraces hybrid and in-person models, there is now a virtual deposition solution.

eLitigate is the future for virtual depositions

eLitigate is a purpose-built videoconferencing and case exhibit management solution that seamlessly integrates a suite of essential features to streamline your workflow. It's an all-in-one-solution for lawyers and litigation teams, complete with case exhibit folders that follow you from deposition to deposition. Whether it's a single deposition or multiple depositions spanning the duration of a case, eLitigate addresses the long-standing need for an integrated solution that replicates the in-person deposition process.

The platform standardizes and optimizes virtual depositions, completely changing how court reporting is conducted with integrated video conferencing, video capture, advanced case exhibit management, private sidebar rooms, and in-session audio testimony review.

eLitigate stands as a truly seamless platform, empowering lawyers, court reporters, paralegals, and corporate legal departments to concentrate on their cases. eLitigate ensures that technology enhances your workflow, allowing you to focus on what matters most without technological distractions.

Case Teams

eLitigate facilitates seamless team collaboration of document selection, review, presentation, and questioning. Create a team, and each member has full document presentation rights

Advanced Exhibit Capabilities

Ability to keyword search, annotate and draw shapes, apply signatures, direct the witness and/or other participants to a particular page, and expand exhibits to view in full-screen mode. Screen sharing for audio, video, and unusual file types

Case Exhibit Management

Past exhibits are always at hand. After each deposition, eLitigate automatically adds that deposition's exhibit folder to future case depositions. This simplifies the exhibit preparation process for the next deposition. With intuitive drag-and-drop document upload, private preview, and public-view tabs for controlled exhibit sharing, lawyers keep control over the proceeding

Testimony Playback with ScriptSync Live running speech-to-text testimony viewable in real-time. Users can search the text and playback the actual audio

Private Sidebar Rooms

Non-discoverable sidebar rooms are accessible with a single click. Important off-the-record meetings are conducted in an environment that attorney's control. No host support needed to create sidebars

Data Security

Comprehensive compliance and security that meets the legal industry's strict standards. All media traffic, audio, and video are AES-256-bit encrypted from end-to-end

Video Capture

High-definition video capture records directly to the cloud. Flexible recording modes enable videographers to easily capture all participants or only the witness

Always Evolving

Enhancements driven by continuous customer feedback. A leading-edge virtual deposition experience built by and for litigation professionals

"The biggest benefit to using eLitigate is having a single platform to have everything organized and more streamlined for the deposition. eLitigate eliminates screen share risk of showing something that is not intended. It provides an opportunity to have a cleaner set up and a more organized layout of the materials that will be used in the deposition."

- Andre Webb, Partner, German, Gallagher & Murtagh, P.C.

"eLitigate eliminates virtual deposition pain points. Zoom just wasn't designed for lawyers. eLitigate's sidebars and exhibit management features are specific to what litigators do. The ScriptSync feature is very helpful because it embeds the deponent's response in your head, assists with follow-up, and helps me recall my previous questions."

- Kelly M. Henry, Attorney,

Berman Berman Berman Schneider & Lowary, LLP
